DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

Claims 1, 2, 6, 11 and 13 are rejected under 35
 U.S.C. 102(b) as being anticipated by 4,566,695 (Melby).

Regarding claims 1, 2, 6 and 13, Figure 1 of Melby shows the recited head, handle, substantially inflexible parallel longitudinal and transversal sides, wherein the transversal strings are substantially the same length and the longitudinal strings are substantially the same length.

Regarding claim 11, because all the strings are of the same length, the vibrational frequencies will be equal.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the

Application/Control Number: 09/971,830

Art Unit: 3711

art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 4, 7, 9 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Melby as applied above.

Regarding claim 4, because Melby intends the racquet to be rectangular and it is well-known in the art that the tensions involved in the stringing process naturally deforms a racquet to a minor degree, it would have been within the capabilities of one of ordinary skill in the art to slightly bow the Melby racquet to offset the inwardly-pressing tendency of the string tension so the strung racquet frame would be rectangular.

Regarding claim 7, the recited dimensions are within the range of tennis racquets known in the art and are not considered to be critically limiting.

Regarding claim 9, the curvature of the rectangular shape of the Melby racquet is zero.

Regarding claim 12, it is old and well-known in the art to adjust the tension of the strings to achieve a particular ball response characteristic.

Response to Arguments

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
